EnergyCAP

**The best selling energy management software for over 30 years**

EnergyCAP Express: Measure, Manage, Save®

For many organizations, energy is the most controllable operating expense. But you can't control what you don't manage.

Start managing your utility bills with EnergyCAP Express, web-based tracking software. Turn your energy information into savings.

- Identify inefficient facilities through peer benchmarking
- Audit utility invoices to catch mistakes
- Automatically receive ENERGY STAR ratings
- Calculate and report greenhouse gas emissions
- Communicate performance through a customizable dashboard and more than 100 online reports
- Reduce energy usage and spending organization-wide

EnergyCAP Express is set up quickly, easy to use, and affordable—the ideal energy management tool for small and medium-sized organizations.

Functionality Without Complexity

EnergyCAP Express provides all the functionality to effectively manage your organization's energy usage without the need for a lengthy, complex implementation process. And since it's completely web-based, there is no software to install, which means no burden on your IT department. Get up and running quickly.
